

Put yourself in the picture

Bethany and Teresa do a mixture of long-term and short term fostering

As a lesbian couple we were initially worried that we would be scrutinised and discriminated against. However we've not found this to be the case at all. We have been treated with the same standards that any heterosexual couple has been.

Fostering has enriched our lives, it's brought us many new friends and challenges. As well as some amazing children whom have touched our hearts and will remain in our hearts for many years after they have left.

If fostering or adoption is something you've ever considered I'd most certainly get in touch, it's the most amazing thing to do in the world. Providing a child with a forever family or being part in a child's path to finding their forever family is the most rewarding thing in the whole wide world to do.
