The Future of Grimsby Town Centre Plans for Transformation

This masterplan will focus on the entire town centre, from Alexandra Dock in the north, to Wellowgate in the south, and from Cartergate in the west, to King Edward Street in the east.

Because this area is so large, we have chosen to break it into three key areas: Riverhead (including Garth Lane), St James and Alexandra Dockside. The locations of these areas can be seen below.

We think that these areas can serve different purposes, but we know that they must also connect, and work together. Whilst some ideas might be for specific locations, we are also thinking about how the whole town works together. The masterplan does not cover the Kasbah area, or the Freeman Street opportunity site, but we will make sure any new plans complement and link with those areas.

The following 4 boards provide more detail on our ideas for these areas. We are keen to get your feedback on these ideas, and to hear your own ideas for them too.

AREA OF FOCUS
