

July 2020

Dear Householder,

Changes to your recycling collections

At the end of last year, we invited people to give us their views in a consultation on how we might collect recycling in future. The preferred option was to replace the boxes with new wheeled bins for recycling.

From late July, we will be delivering a new blue and a new grey wheeled bin for recycling to every household in North East Lincolnshire. It will take about four months to complete.

The new bins replace your existing recycling boxes. Please put your house number on your new bins when they arrive. You can start using your new bins straight away. Simply put them out instead of your recycling boxes on your usual collection day. The collection days remain the same for now. We'll contact you again if there is a change.

There are no changes to your green bin collections for household waste (or your garden waste bin, if you have one).

What to do with your existing recycling boxes

You can keep your recycling boxes, either as storage containers or for other uses. If you don't want them, leave the empty boxes next to your new recycling bins on your next collection day or take them to the Community Recycling Centres in Grimsby or Immingham.

Look out for your new bins arriving soon. We'll give you an information pack with your new bins to explain what can and can't be recycled in each new bin.

If you don't have a front garden or you live in a property where it's difficult for us to collect wheeled bins from, we'll contact you again with more information.

Sign up for email updates about waste and recycling at www.nelincs.gov.uk/BinUpdates.

For more information, to check the bin delivery schedule or for an electronic version of this letter, visit www.nelincs.gov.uk/bins. Alternatively, call our waste hotline on 01472 326288.

Yours faithfully,

The Waste Team
