

Supplementary Note – Relevant to all planning committee items

The National Planning Policy Framework was updated, and this was published on the 12th December 2024.

Importantly whilst some of the paragraph numbers have been amended, the overarching chapter numbers have not changed. These are as set out on the ‘Relevant Planning Policies and Background Papers’ part of the individual committee reports.

Where reference is made moving forward, this will be in relation to the National Planning Policy Framework 2024 (NPPF 2024).

To confirm, where reference is made to the NPPF in the reports to be considered, there is not considered to be any material changes that justify amendments to the reports or their consideration.
