The board members gave an update on each of the areas that they were representing on how their organisations were helping to recruit and provide training for people looking for work.

Mr Barnes highlighted the life expectancy figures and explained that the challenge would be to keep people working for longer and physically and mentally well.

The members of the panel welcomed the work going on across the borough with the different agencies to support resident gaining employment, skills and qualifications. The board particularly highlighted the good work with care leavers.

With more specialists being trained there was a focus on reducing the waiting time in a positive direction. She referred to the good waiting well offer from Young Minds Matter to support young people to get help in the interim.

The board welcomed the plans put into place to reduce the waiting time for specialist diagnosis. They were reassured that through the care leavers hub and spoke model there would be additional capacity to deliver services for care leavers with effect from 1<sup>st</sup> April 2025.

RESOLVED – That the presentation be noted.

In response to Ms Slattery's earlier question about attracting more people to work in the area and concerns about the medical infrastructure around access to GP's and dentists because they were already stretched, Ms Kenyon explained as part of her update that it was key to support residents to stay well with greater intervention and testing programmes which would reduce the pressure and reliance on the primary and secondary care.

RESOLVED – That the update be noted.
