Site Briefing Sheet – Grimsby Fishing Heritage Centre

We want your visit to be a safe and happy one. This information and matrix are provided to help you prepare a personalised risk assessment before a visit to the centre. Risk assessments for workshops will be sent to you when a booking is made.

Grimsby Fishing Heritage Centre is open to the general public. You may wish to pay particular attention to potential risks posed by:

- The traffic in the car park in front of the museum
- Public toilets with hot and cold running water
- Areas of poor visibility in the centre.
- Children becoming excited or disorientated when visiting somewhere new

The building contains a number of features that contribute to its unique and enjoyable character. These include:

- Steep stairs
- Lower light levels in some areas
- Narrow corridors, staircases and doorways
- Rope and inflexible barriers
- Heavy hinged doors
- Activity boxes, equipment and furnishings

On assessment we feel that there is a low level of risk for pupils and adults when

- A risk assessment has been completed by the group leader
- A pre-visit briefing is provided for children and adult helpers
- Sufficient adult helpers are provided.

We recommend a minimum of 1 adult for every six children at Key Stage 1 and at least one adult for every ten children at Key Stages 2 +

We are currently updating our website. If you require further advice about health and safety in the meantime, please contact the museum on 01472 323345 before your visit.
